Slot accounting system (SAS) is a software protocol developed by IGT. Having been used for the development of slot machines .Q: Power Query - How to combine columns from multiple files? I need to do something like a concatenation on a couple of columns from a bunch of files. So I have: A folder with ~500 files. Each file is a field/row in the final result. The files all have these columns: Field1 Field2 Now I need to add the values of Field2 from all files into one sheet. The folder is like this: field1.csv field2.csv field3.csv field4.csv ... ... field500.csv field501.csv A: You can use this M code in PowerQuery. Import the files in column A and the values in column B and export the output as a CSV. Of course you will need to work the max value of column B, or you can create an if statement in M. Q: SetJLabelIconNotifies() not working for different Look&Feels I want to set Icon Notification for jLabel. But it is not working for different L&F. So is there any other way I can

set Icon Notification for jLabel.? Or Is there any other way to disable or change the icon of jLabel? When changing L&F, for example from Windows to Mac OS, the icon of jLabel is changing. How can I achieve the same? A: Instead of setting the icon you may use another icons with more support to d0c515b9f4
