In the early days, heeled boots were primarily worn by men as a symbol of status and power. However, as society progressed, women began to adopt this fashion trend as well. During the 16th and 17th centuries, heeled boots became a popular choice for women of the upper class. These boots were often adorned with intricate designs and made from luxurious materials.

As the centuries passed, heeled boots became more accessible to women of different social classes. The height and style of the heels varied, with some opting for more modest heels while others embraced towering heights.
